“ It exposed a food system that was rigid, consolidated, and fragile. Meanwhile, those growing, processing and preparing our food are earning less each year in a system that rewards size over all else.

USDA unveils new initiative for food and agriculture ...

A cereal is any grass cultivated (grown) for the edible components of its grain (botanically, a type of fruit called a caryopsis), composed of the endosperm, germ, and bran. The term may also refer to the resulting grain itself (specifically "cereal grain"). Cereal grain crops are grown in greater quantities and provide more food energy worldwide than any other type of crop and are therefore ...
