The Landing gear drop test is a dynamic test of simulating aircraft landing impact. The situation of landing gear is obtained by

# Download Free Aircraft Landing Gear Drop Test Simulation And Design Evolution

measuring various parameters such as displacement, load, acceleration, force and strain. The more parameters are measured, the more clearly it simulates the situation at landing.

Experimental Research on Aircraft  
Landing Gear Drop Test ...

Abstract: The structure of a shock absorber based on magnetorheological (MR) damper with a metering pin is proposed, and structure of the magnetic circuit of MR damper is optimized.

# Download Free Aircraft Landing Gear Drop Test

Simulation And Design Evolution

By drop tests, the damping characteristics of the shock absorber and damping effect are tested. The experimental results show that the shock absorber has the characteristic of a wide damping force adjustment range and lower energy dissipation.
