~~Anxiety The Lancet~~

In a world of multiple and seemingly multiplying so-called anxiety disorders, it is no wonder that "anxiety" has become one of the most frequently used words in medical (and popular) discourse. But it was not always so; almost unimaginable to us now, there was once an English-speaking world without "anxiety"—or at least without our psychological concept of it.

~~Anxiety—The Lancet~~

To our knowledge, this is the largest contemporary review of pharmacological agents for the treatment of generalised anxiety disorder by use of network analysis. There are several effective treatment choices for generalised anxiety disorder across classes of medication. The failure of initial pharmacological therapy might not be a reason to abandon a pharmacological treatment strategy.

disorders than for mood disorders. The impact of COVID-19 on anxiety is in line with expectations and highlights the need for effective and accessible interventions. Our data show increased diagnoses in all major anxiety disorder categories, and it remains unclear whether post-COVID-19 anxiety will have a particular post-traumatic stress disorder-like picture.
