What's new in ASP.NET MVC 3/4
ASP.NET MVC is a web development framework on the Microsoft .NET platform that provides a way for developers to build well-structured web applications. Introduced as an alternative to Web Forms, ASP.NET MVC has significantly grown in popularity since its first public preview in 2007, and now many large web applications are built using this technology.

ASP.NET MVC 4 in Action by Jeffrey Palermo

An action method can be a child or a normal action method, but child actions are action methods invoked from within a view, you cannot invoke a child action method via user request (URL). We can annotate an action method with the [ChildActionOnly] attribute to create a child action. Normally we use child action methods with partial views.
