se acompaña por una pequeña explicación textual de la estructura observada por preguntas de opción múltiple para facilitar el aprendizaje y la retención. Su contenido y características de portabilidad y conveniencia convierten a esta obra en una excelente herramienta para preparar las actividades de los estudiantes en clase y en el laboratorio de disección y para recuento anatómico en práctica quirúrgica. En esta edición: Ocho secciones con igual número de regiones anatómicas Preguntas de autoevaluación sobre identificación de estructuras anatómicas o de correlación clínica Mas de 200 ilustraciones (fotografías) a todo color con disecciones de alta calidad en especímenes cadavéricos "

This atlas features outstanding full-color photographs of actual cadaver dissections, with accompanying schematic drawings and diagnostic images. The photographs depict anatomic structures more realistically than illustrations in traditional atlases and show students exactly what they will see in the dissection lab. Chapters are organized by region in order of a typical dissection. Each chapter presents structures both in a systemic manner from deep to surface, and in a regional manner. This edition has sixteen additional pages of clinical images—including CT and MRI—that students can compare with cross-sectional anatomic photographs. Many pictures have been electronically enhanced or rescanned for better contrasts.

This Color Atlas of Anatomy features full-color photographs of actual cadaver dissections, with accompanying schematic drawings and diagnostic images. The photographs depict anatomic structures with a realism unmatched by illustrations in traditional atlases and show students specimens as they will appear in the dissection lab. Chapters are organized by region in order of standard dissection, with structures presented both in a systemic manner, from deep to surface, and in a regional manner. This edition has additional clinical imaging, including MRIs, CTs, and endoscopic techniques. New graphics include clinically relevant nerve and vessel varieties and antagonistic muscle functions. Many older images have been replaced with new, high-resolution images. Black-and-white dissection photographs have been replaced with color photography. A companion website will include an Image Bank, interactive software (similar to an Interactive Atlas), and full text online.

This atlas features photographs of actual cadaver dissections, with accompanying schematic drawings and diagnostic images. The photographs depict anatomic structures more realistically than illustrations in traditional atlases and show students what they will see in the dissection lab.

This new manual takes a systemic approach with each chapter focusing on one body system. The order of chapters follows the traditional order found in anatomy or anatomy and physiology courses. The photos include skeletal images, photomicrographs of
