If your ISP is using NAT itself, it may be impossible to get the NAT/Firewall test to work because it is being cut off at your ISP. Some ISPs (especially mobile/cellular/3G service providers) use carrier grade NAT , meaning they only give users private IP address from those private ranges and then users are most likely doomed to live with ...

An IPv6 transition mechanism is a technology that facilitates the transitioning of the Internet from the Internet Protocol version 4 (IPv4) infrastructure in use since 1983 to the successor addressing and routing system of Internet Protocol Version 6 (IPv6). As IPv4 and IPv6 networks are not directly interoperable, transition technologies are designed to permit hosts on either network type to ...
