It is the ability to move around and manipulate his/her environment. There are four stages of motor development in children. Infanthood (0-2 years) Early childhood (2-6 years) Middle childhood (7-12 years) Later childhood (12 years and later) The first stage is marked by extremely rapid growth and development, as is the second stage. By the age of 2 years, this development has begun to level out somewhat.

*Child development stages: Ages 1-5 the early years*

The 5 Stages of Child Development. Children change rapidly as they grow. Many of these changes are physical. Other changes are cognitive, which means the changes affect the way children think and learn. Child development often occurs in stages, with the majority of children hitting specific developmental landmarks by the time they reach a certain age.
