Re: Chevy 350 Engine/Mercruiser 5.7 Problems!! I put the boat in the shop on July 29th and just got it back 2 days ago. That is 2 weeks in the shop to replace a fuel pump/system and re-do some wiring with fuel hoses and such.

~~Chevy 350 Engine/Mercruiser 5.7 Problems!! | Boating Forum~~ ~~---~~

Well, Mercruiser called and they want one more test done. They want to decarbonize the cylinders to see if the rings are stuck. If that doesn't work (they will do a leak down test after that), then they will give me a new engine. To be honest I would prefer a quick fix as taking out the engine and replacing it will be a nerve racking exercise!

Air vent in fuel cap not open. Faulty emergency kill switch. Some engines -- not the pull-start kind -- have a battery that starts it. If your engine has a battery, make sure it is charged up before use; verify the battery connections are clean -- as corroded connections can keep a Mercury outboard from starting.

Mercruiser or someone else) figured out that the 180 degrees was wrong. Since it has a 160 degree thermostat, mercruiser says it should not go above 160 degrees, no matter what! Apparently starting sometime in 1995, Mercruiser Alpha 1's began having a problem. Now I've heard 2 stories (Well 3, if you count the "There's nothing wrong").

Re: Common 5.0 L MerCruiser? Alpha I Problem? I can't help as to common issues but I will say that that is a very common motor and there are very few choices as far as boat motors (I/O's) are concerned. They (mercruiser) have been using the same basic set ups for 30 years or so. it goes something like this...

~~Common 5.0 L MerCruiser? Alpha I Problem? | Boating Forum~~ ~~---~~

Valve and tappet noise usually begins as a clicking sound, or chatter, at half engine speed and may then disappear at high speeds. The cause is often excessive valve clearance or a defective hydraulic valve lifter. To check your clearances, you can insert a thickness gauge between the valve stem and the rocker arm or lifter.
