Intelligence Systems

BUSINESS INTELLIGENCE IN DECISION SUPPORT SYSTEMS. A decision support system (DSS) is a computer-based information system that supports business or organizational decision-making activities; typically this results in ranking, sorting, or choosing from among alternatives. DSSs serve the management, operations, and planning levels of an organization (usually mid and higher management)

What is Business Intelligence? BI Definition

Business intelligence tools are essentially data-driven decision support systems (DSS). BI is sometimes used interchangeably with briefing books, report and query tools, and executive information systems. With these tools, business people can start analyzing the data themselves rather than wait for IT to run complex reports.
