The highest and lowest concentrations of metals were related to Fe and Hg, respectively. Results showed that tobacco, charcoal and smoke of waterpipe contained significant contents of toxic metals and BTEX, and exposure to these components could be the main reason for the concerns about waterpipe smoking.

within the first 10 min and tended to reach constant values (> 70% of the extracted analytes) after 20 min, whereas the equilibrium was reached within 60 min (> 90% of the extracted analytes) for phenols. The slower equilibration times with PA coating for phenols extraction is due to two main causes.
