Gastrointestinal (GI) cancer, a cancer of different organs of the digestive system, is one of the most common cancers around the world. The incidence and death rate of some of these cancers are very high. Although a large variety of chemotherapeutic agents have been introduced

since the last few decades to combat GI cancer, most of them are very expensive and have side effects.

Indeed, McKeachie, in Teaching Tips (8th Ed.), has maintained that "Attention typically increases from the beginning of the lecture to 10 minutes into the lecture and decreases after that point," a sentiment still echoed by this author more than 20 yr later in the 14th edition of the book. Several points are noteworthy regarding these ...

The Enteritidis and Dublin serovars of Salmonella enterica are phylogenetically closely related yet differ significantly in host range and virulence. S. Enteritidis is a broad-host-range serovar that commonly causes self-limited gastroenteritis in humans, whereas S. Dublin is a cattle-adapted serovar that can infect humans, often resulting in invasive extraintestinal disease.
