Chapter 13: The Human Reproductive System

Fertilization may occur even if copulation took place up to 3 days before ovulation, since male gametes remain viable for about 72 hours within the female reproductive system. However, the fertile period of the women is considered to be the period from 7 days before ovulation to 7 days after ovulation. 27.

a zygote that eventually develops into a growing fetus.

Human Reproduction - CliffsNotes Study Guides

CBSE Class 12 Biology Revision Notes Chapter 3

Human Reproduction Humans are sexually reproducing and viviparous. The reproductive events in humans include formation of gametes (gametogenesis), i.e., sperms in males and ovum in females, transfer of sperms into the female genital tract (insemination) and fusion of male and female gametes (fertilisation) leading to formation of zygote.
