Algorithm Design by Jon Kleinberg and Eva Tardos, Addison-Wesley, 2006. We will cover almost all of chapters 1-8 of the Kleinberg/Tardos text plus some additional material from later chapters. In addition, I recommend reading chapter 5 of Introduction to Algorithms: A Creative Approach , by Udi Manber, Addison-Wesley 1989 .

In computational complexity theory, NP (nondeterministic polynomial time) is a complexity class used to classify decision problems.NP is the set of decision problems for which the problem instances, where the answer is "yes", have proofs verifiable in polynomial time by a deterministic Turing machine.. An equivalent definition of NP is the set of decision problems solvable in polynomial time ...
