To achieve the optimum detector performance, an area surrounding the aperture of the detector known as the Metal Free Zone (M.F.Z.) must be kept free of metal. The size of this zone will be dependant upon the type of detector, the detector's aperture height and the detector's operating sensitivity.

**SAFELINE INC - Genemco**

This manual is regarded as an integral part of the detector. This manual must always be kept with the detector for the whole of its operating life. This manual includes all the features available with the firmware version 2.01 to 2.49. Please note that all these features may not be included as standard. WARNIN G
