A multilateral development bank (MDB) is an institution, created by a group of countries, that provides financing and professional advice to enhance development. An MDB has many members, including developed donor countries and developing borrower countries. MDBs finance projects through long-term loans at market rates, very-long-term loans below market rates (also known as credits), and grants.

Multilateral Development Bank (MDB) Definition

Definitions. Multilateralism, in the form of membership in international institutions, serves to bind powerful nations, discourage unilateralism, and gives small powers a voice and influence that they could not otherwise exercise. For a small power to influence a great power, the Lilliputian strategy of small countries banding together to collectively bind a larger one can be effective.
