~~Application Express Application Builder User's Guide~~

The best way to get started with the Oracle APEX App Builder is to build an app. First, let's determine what kind of data you want to build your application on. You can easily create apps based existing tables you already have, based on data in a spreadsheet, or based on an entirely new data model. Explore the videos below that walk you through each scenario and teach you how to start using the App Builder.

~~Getting Started with App Builder - Oracle APEX~~

To access Application Builder: Log in to Oracle Application Express. The Workspace home page appears. To view the Application Builder home page you can either: Click the Application Builder icon to link to the Application Builder home page. Click the down arrow on the right side of the Application Builder icon to view a drop down menu.

To create a new user account: Log in to Oracle Application Express Administration Services. See "Logging in to Oracle Application Express Administration Services". Click Manage Workspaces. Under Manage Workspaces, click Manage Developers and Users. The Manage Developers and Users page appears. Click Create.

~~Managing Users in an Oracle Application Express Instance~~

The encoding of pages in App Builder is determined by the character set of the Database Access Descriptor (DAD) used to access Oracle Application Express. For example, if the character set of the Database Access Descriptor is AL32UTF8, all pages in all applications in the Oracle Application Express user interface are encoded in UTF-8.

~~Managing Application Attributes - Oracle~~

Oracle Application Express (APEX) Empower citizen and professional developers to focus on solving business problems rather than worrying about the underlying platform. Oracle APEX uses low-code development to let you build data-driven apps quickly without having to learn complex web technologies.

~~Develop and Deploy Apps - Oracle APEX~~

If an APEX application has set the Application Primary Language to 'German (Switzerland)(de-ch)', there are unnecessary TAB characters in the strings in certain constellations when downloading an Interactive Report as CSV. This then cause client tools such as Excel to not be able to read the CSV data correctly.

~~APEX 20.1 Known Issues - Oracle~~

APEX 20.1 can also be used with Oracle Database 18c Express Edition (XE), but is supported only through the OTN discussion forum, and not through Oracle Support Services. For more information on upgrading APEX within Oracle XE go to the installtion guides for Linux or Windows. We support installation on the following platforms: Linux x86

~~Oracle apex application builder tutorial~~

Oracle Application Express (APEX) is a low-code development platform that enables you to build scalable, secure enterprise apps, with world-class features, that can be deployed anywhere. Using APEX, developers can quickly develop and deploy compelling apps that solve real problems and provide immediate value. You won't need to be an expert in a vast array of technologies to deliver sophisticated solutions.

~~Oracle APEX~~

Redwood User Interface: The user interface of APEX and the App Builder has been refreshed with Redwood design, Oracle's new user experience design system. The new interface and color scheme extends across the full developer experience and provides refreshing new visuals.

~~Announcing the availability of APEX 20.1 on Oracle~~

In addition, all privileged application users (database users) would need to be assigned as valid schemas to the workspace, otherwise the above procedure would prevent switching to that database user. The customer can use APEX\_INSTANCE\_ADMIN.ADD\_SCHEMA to add them in a script. Obviously this would also have to be done on the production system. Note that if you had code that referenced the function "USER", it would still not be the applications user. They would get APEX\_PUBLIC\_USER or the ...

~~executing plsql as current user - Ask TOM - Oracle~~

Oracle REST Data Services (formerly APEX Listener) - The Oracle REST Data Services (ORDS) is Java based, can be installed into any J2EE compliant Web Server, and is the preferred option for use with Oracle Application Express. It is a free tool that is fully supported against Oracle WebLogic Server, Oracle Glassfish Server, and Apache Tomcat.
