Population Studies: Population Structure, Density, and Settlements. Differences in population structures within countries can be driven by a high level of rural-urban migration, and these are evident in population pyramids. Migration from rural areas is usually from young adults (whether single or with children), which results in a decrease in the number of people in this age group.

movements over time, general settlement patterns and other subjects such as occupation and how people form the geographic character of a place.

Population Geography Overview - ThoughtCo

Population Geography relates spatial variations in the distribution, composition, migration, and growth of populations to the terrain. Population geography involves demography in a geographical perspective. It focuses on the characteristics of population distributions that change in a spatial context. This often involves factors such as where populations are found and how the size and composition of these
