Despite the diversity of theories of human psychology, the majority shares a view of the personality as a collection of traits, ways of thinking and acting, that allow the observer to define, recognize, and understand people and their motivations. The Eight Crystal Alliances takes a more inclusive, holistic approach toward a personality typology that incorporates the physical body, the thoughts, the emotions, and the soul. The book is based on the study and application of eight magnetic groups of "geometric alliances," eight types of human personality classified along energetic principles linking human nature with "mineral nature." These types, according to the authors, range from Cubic (rational and organized) to Rhombic (sympathetic, empathetic, and serving others) to Buddhic (here-now, spontaneous, creative, non-conventional, freedom-loving, rebellious, but level-headed). Uncovering the hidden relationship between the human and mineral kingdoms, the book addresses the deep vibrational energies contained within stones that can influence our etheric bodies and, consequently, the other bodies we are made of—mental, emotional, and physical. With detailed lists of stone qualities and case histories, the book shows readers how to use the power of these everyday objects in their personal lives and careers as part of their journey of spirit. From the Trade Paperback edition.

Go on a fascinating scientific and spiritual journey in this eye-opening book that explores the body's incredible ability to heal itself—perfect for fans of Deepak Chopra and Anita Moorjani. When we receive diagnoses from medical professionals, we are often so overwhelmed that we give up authority over our own health and well-being. But the truth is, we have more control over our health and life than we have been led to believe, and that belief is at the core of our body's capacity to heal itself. Based on the groundbreaking documentary of the same name, Heal follows two people on their healing journeys, while combining science-backed research and real-world testimonials from experts like Marianne Williamson, Bruce Lipton, Deepak Chopra, Bernie Siegel, Anita Moorgani, Kelly Brogan, and many others, to offer hope and alternative treatments for the many people suffering from a variety of chronic illnesses. By identifying the emotional roots of illnesses, we can tap into the body's healing powers and discover that although healing can be complex and deeply personal, it can also happen spontaneously in a moment. Heal shows us that science and spirituality are united and demonstrates that our thoughts, beliefs, and emotions have a huge impact on our overall health and the ability to recover from illness and injury.
