Multiple Choice Questions Note: Choose most appropriate answer of the following questions: 8.1 Software testing is: (a) the process of demonstrating that errors are not present (b) the process of establishing confidence that a program does what it is supposed to do (c) the process of executing a program to show it is working as per ...

Chapter 8 software testing - SlideShare

Software deployment is all of the activities that make a software system available for use.. The general deployment process consists of several interrelated activities with possible transitions between them. These activities can occur at the producer side or at the consumer side or both. Because every software system is unique, the precise processes or procedures within each activity can ...

Software deployment - Wikipedia

Software definition, the programs used to direct the operation of a computer, as well as documentation giving instructions on how to use them. See more.

Software | Definition of Software at Dictionary.com

Risk management is the identification, evaluation, and prioritization of risks (defined in ISO 31000 as the effect of uncertainty on objectives) followed by coordinated and economical application of resources to minimize, monitor, and control the probability or impact of unfortunate events or to maximize the realization of opportunities.. Risks can come from various sources including ...

Risk management - Wikipedia

La Ingeniería de Software es una de las ramas de las ciencias de la computación que estudia la creación de software confiable y de calidad, basándose en métodos y técnicas de ingeniería. Brindando soporte operacional y de mantenimiento, el campo de estudio de la ingeniería de software. [1] Integra ciencias de la computación, ciencias aplicadas y las ciencias básicas en las cuales se ...

Ingeniería de software - Wikipedia, la enciclopedia libre

We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value: Individuals and interactions over processes and tools Working software over comprehensive documentation Customer collaboration over contract negotiation Responding to change over following a plan. That is, while there is value in the items on
