Qigong (), ch'i kung (), and chi gung are Romanized words for two Chinese characters: qì (气 / 氣) and gōng (功).. Qi (or chi) primarily means air, gas or breath but is often translated as a metaphysical concept of 'vital energy', referring to a supposed energy circulating through the body; though a more general definition is universal energy, including heat, light, and electromagnetic ...

Elite athletes suffer many mental health symptoms and disorders at rates equivalent to or exceeding those of the general population. COVID-19 has created new strains on elite athletes, thus potentially increasing their vulnerability to mental health symptoms. This manuscript serves as a narrative review of the impact of the pandemic on management of those symptoms in elite athletes and ensuing ...
