A Dichotomous Key (Di-kot-o-mus) is a tool used to identify things. They can be used for rocks, animals, plants... just about anything. At the Challenger Center, you will use it to find the identity of mysterious Martian rock samples. Today, you will get some practice. DIRECTIONS: Now you will do the reverse of what you did before.

CHALLENGER SNACK: Dichotomous Keys

Dichotomous Key
Identification

A dichotomous key is a tool that can be used to identify organisms or objects in the natural world, such as plants, animals, or rocks. The key consists of a series of paired statements or clues about features or characteristics, providing a stepwise guide toward identifying each entity.
