~~Mental Status Exam (MSE) — PsychDB~~

The mental status examination (MSE) is a brief evaluation of a patient's behavior and cognitive functioning. Beginning with a history, the examination allows the physician to gather a concept of what the complaint is and the context for the complaint. The history is followed by assessments of psychiatric status and cognitive status.

~~Mental Status Examination — an overview | ScienceDirect Topics~~

The mental state examination (MSE) is a structured way of observing and describing a patient's current state of mind, under the domains of appearance, attitude, behaviour, mood, affect, speech, thought process, thought content, perception, cognition, insight and judgement. The purpose of the MSE is to obtain a comprehensive cross-sectional description of the patient's mental state, which when combined with the biographical and historical information of the psychiatric history, allows the ...

involves a series of examinations and observations designed to reveal either pathological or normal findings. Then you would record all of your observations and results in a mental status exam template.

~~47 Free Mental Status Exam Templates (MSE Examples) ? ...~~

A mental status examination, just like a physical examination, is an intrusion on the patient's rights and should not be conducted against the patient's will. Before a physician performs a mental status examination, s/he must explain the procedure to the patient and ensure the patient understands that exam results will be documented.

~~Mental Status Exam (MSE) — Factors and Definitions ...~~

The patient's attention span is assessed first; an inattentive patient cannot cooperate fully and hinders testing. Any hint of cognitive decline requires examination of mental status (see Examination of Mental Status), which involves testing multiple aspects of cognitive function, such as the following:

Orientation to time, place, and person
