Kia Forte P0121: TPS → Switch "A" Circuit Range ...

The Throttle Position sensor moves with the throttle and sends a voltage signal to the computer indicating throttle angle and speed of movement data. The computer uses this data to measure engine load, adjust timing, fuel delivery, EGR, converter clutch operation and clear flood mode. The TPS is mounted on the throttle body.

Get Free Tps Sensor Kia Forte

The Throttle Position Sensor monitors the angle of the throttle blade. When the throttle is closed, the signal that is sent back to the ECM is around .45 volts. When the throttle is wide open, the signal will be around 5 volts. P0123 occurs when the voltage from your Forte's TPS is higher than the upper operational range.

Best Throttle Position Sensor (TPS) for Kia Cars, Trucks ... Instead of the traditional throttle cable, an Accelerator Position Sensor (APS) is used to receive driver input. The ECM uses the APS signal to calculate the target throttle angle; the position of the throttle is then adjusted via ECM control of the ETC motor. The TPS signal is used to provide feedback
