Modes Canary has three modes: away (shield), home (house), and night (moon). In away mode, Canary monitors your home for activity and sends you a push notification with a video when it detects movement. In home mode, Canary can send you notifications when it detects activity, record activity without notifications, or you

How do I set up my Canary? - Canary Help Center

Welcome to the OpenCanary guide. OpenCanary is a daemon that runs canary services, which trigger alerts when (ab)used. The alerts can be sent to a variety of sources, including syslog, emails and a companion daemon `opencanary-correlator`. The Correlator coalesces multiple related events (eg. individual brute-force login attempts) into a single alert sent via email or SMS.

Canary's smart alerts distinguish between people and motion and include an image thumbnail, so you know in an instant whether a family member, foe, or a four-legged friend is in your home. Security that pays for itself. Since 2015, Canary users have saved more than an estimated \$5M on insurance premiums just by owning a Canary device.
