This book presents a comprehensive, systematic approach to the development of learning strategies.

Now in its 147th edition, The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world. Covering political, economic, social and cultural aspects, the Yearbook is an essential resource.

What is Anthropology? Why should you study it? What will you learn? And what can you do with it? What Anthropologists Do answers all these questions. And more. Anthropology is an astonishingly diverse and engaged subject that seeks to understand human social behaviour. What Anthropologists Do presents a lively introduction to the ways in which anthropology's unique research methods and cutting-edge thinking contribute to a very wide range of fields: environmental issues, aid and development, advocacy, human rights, social policy, the creative arts, museums, health, education, crime, communications technology, design, marketing, and business. In short, a training in Anthropology provides highly transferable skills of investigation and analysis. The book will be ideal for any readers who want to know what Anthropology is all about and especially for students coming to the study of Anthropology for the first time.

Activating Critical Thinking to Advance the Sustainable Development Goals in Tourism Systems focuses on the role of critical thinking and inquiry in the implementation of the 2030 Sustainable Development Goals (SDGs) in tourism systems. The impetus for the development of this book emerged from the declaration by the United Nations (UN) General Assembly of 2017 as the International Year of Sustainable Tourism for Development. This declaration purposely positions tourism as a tool to advance the universal 2030 Agenda for Sustainable Development and the 17 SDGs, thus mutually serving as an opportunity and responsibility to appraise from a critical lens what the SDGs signify and how they can be understood from multiple perspectives. The chapters in the book foster the next phase of sustainable tourism scholarship that actively considers the interconnections of the UN's SDGs to tourism theory and praxis, and activates critical thinking to analyze and advance sustainability in tourism systems. It articulates the need for the academy to be more intrinsically involved in ongoing iterations of multilateral accords and decrees, to ensure they embody more critical and inclusive transitions toward sustainability, as opposed to market-driven, neoliberal directives. The contributions in this book encourage various worldviews challenging, shaping, and more critically reflecting the realities of global communities as related to, and impacted by, sustainable tourism development. The chapters in this book were originally published as a special issue of the Journal of Sustainable Tourism.
