When they mention about amino acid (the building blocks of proteins) synthesis, then it is the process of making amino acids out of its many basic elements or constituents. But in the field of Humanities, synthesis (in the case of philosophy) is the end product of dialectic (i.e. a thesis) and is considered as a higher process compared to analysis.

In mathematics, Fourier analysis ( $f(x) = \sum_{n \in \mathbb{Z}} c_n e^{inx}$ ) is the study of the way general functions may be represented or approximated by sums of simpler trigonometric functions. Fourier analysis grew from the study of Fourier series, and is named after Joseph Fourier, who showed that
